# Capstone Bank – Indian Hills Branch

This project is both a renovation and an addition to the new branch for Capstone Bank. The challenge for this project is the phasing of the construction. Capstone Bank will remain open for normal business while the construction of this project takes place. The renovation part of the construction will replace the outside brick veneer with a more modern veneer and update the interior finishes. The addition will almost double the size of the existing building, creating more office space to make it a more operational branch to better serve it's customers.
