

James E. Latham

# Shingle Plant for Elk Roofing

This expansion of their Tuscaloosa facility creates an additional shingle production line for dimensional shingles. Our building is about 900' long, 155' wide and varies in height from 40' to 105' high. The metal building was completed in 120 calendar days. The plant went into production a month ahead of schedule. Due to this early completion, our firm received a performance bonus on this project.
